Education

South China University of Technology

Sep 2021 – Jun 2025

Bachelor of Software Engineering, GPA:3.85/4.0 (90.42/100.0, Excellent Engineer Class)

Guangzhou

Relevant Coursework

- Mathematical Analysis
- Machine Learning
- Discrete Mathematics
- Data Mining
- Linear Algebra
- Deep Learning
- Data Structures
- Database System

Experience

Machine Learning and Data Mining Lab (advised by Qianli Ma)

Oct 2023 – Present

Research Intern

School of Computer Science, SCUT

- Mainly focused on research in data mining and time series modeling, especially time series forecasting and classification.
- Researched on Mixture-of-Experts and multi-scale modeling in time series problems (will be submitted to ICLR25).
- Researched on irregular time-series forecasting and Graph Neural Network (will be submitted to AAAI25).
- Understood graph learning and spatio-temporal data mining, including graph neural network, GCN, GAT, etc.

CityMind Lab (advised by Yuxuan Liang)

May 2024 – Present

Research Intern

Hong Kong University of Science and Technology (Guangzhou)

- Researched on time-series analysis and spatio-temporal data mining, especially foundation models.
- Involved in one paper's work on non-parameter embedding on foundation model (will be submitted to ICLR25).

Key Laboratory of Big Data and Intelligent Robot (advised by Yi Cai)

Mar 2023 – Present

Research Intern

School of Software Engineering, SCUT

- Researched on natural language processing and LLM, engaged in practical research on models, ChatGLM, etc.
- Finished the project “WiseSight: AIGC-based Smart Glasses for Elderly Life Assistance”. This project has won the First Prize of National College Students' Software Innovation Competition (South China) and National Second Prize.
- Researched on LLM hallucination and RAG technology, developing the project “Natural Language Content Matching System Based on LLM”. Responsible for work on search engine augmentation.

Projects

WiseSight: AIGC-based Smart Glasses for Elderly Life Assistance | Python

Oct 2023 – Present

- Aimed at elders and adopted a Client-Server architecture, using ChatGLM as LM base and fine-tuning.
- It performed Intelligent Interaction, Assisted Reading, Item Searching and Emergency Assistance function modules.
- Developed object recognition and scenario recognition for Item Searching, utilizing object detection models, like detec.
- Wrote innovative project documents, software development documents, and software testing documents.

Beyond Guessing: Data-Driven Exploration of Word Features and Relationships | Python, L^AT_EX

Feb 2023

- Used ARIMA model to solve problems related to time-series analysis, determined ACF & PACF values and forecasted.
- Used the K-means clustering method to determine the difficulty level of the problem, TOPSIS entropy weight analysis.
- Utilized SPSS and Matlab for data preprocessing, analysis and visualization. Proficient in using L^AT_EX to write paper.
- This paper received Finalist (Top 0.17%) in Mathematical Contest In Modeling. [\[Paper Link\]](#)

Technical Skills

Programming Languages/Software: Python, C++, Java, Matlab, L^AT_EX, PyTorch, SQL, Linux

English Level: CET6: 512, CET4: 567

Honors and Awards

- National Scholarship (rank: 1/49) 2022
- Top Ten Excellent Student Models of SCUT (The best honor for undergraduates in SCUT) 2023
- Top Ten Excellent Communist Party Members Nomination Award of SCUT 2024
- First Prize Scholarship of South China University of Technology (rank: 2/49) 2023
- Finalist of Mathematical Contest In Modeling (MCM, Top 0.17%) 2023
- First Prize of Chinese Mathematics Competitions (CMC) 2022 and 2023 (twice)
- Gold Prize of National College Student Algorithm Design and Programming Challenge 2023
- First Prize of Guangdong Province College Student Computer Innovation Competition 2024
- Second Prize of MathorCup College Mathematical Modeling Challenge 2023

Leadership / Extracurricular

Monitor of class

Sep 2022 – Present

South China University of Technology

- Led class to receive Top Ten Excellent Classes Nomination Award of South China University of Technology in 2023.
- Talented in Mathematical Analysis (Score: 98, rank: 1/124), received Excellent Auxiliary Volunteer.
